Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

This very good early twentieth-century commercial building is oriented with its gable end to the east, facing directly onto Old Town Road. It is a framed building with vertical matchboard The central section is two stories high. There are original side-hinged double doors in the second-story gable end, for loading. These have been stabilized and patched shut with a modern domest gable roof truss, which also serves to advertise the business. The first-floor facade is composed almost entirely of sliding wood panels. On the northeast corner of the interior is a winder stair to the second story. Two brick stove flues accommodate a pair of stoves. Clerestory windows light the second story. The two-story section of the building is extended by a two-story cross wing on the rear. The north one-story side shed serves as an office for the business. The south shed provides additional storage. The gable roof of the central structure is supported by rafters with exposed ends at the eaves. The south shed is attached by a wood hyphen to later gable-fronted garage-like structures and a three-bay office with a gable roof and six-over-six sash.

8. \$	Significance	Survey No.	T-765
